

JOB DESCRIPTION

The nature of *LIN-ZHI INTERNATIONAL*'s business dictates that personnel must remain flexible with the ability to accept responsibilities within their educational and training levels. These may be different from those stated on their "Terms of Employment."

JOB TITLE:

Scientist, Development

RESPONSIBLE TO:

R&D Project Manager

GENERAL DUTIES:

- Bring new products to market and conduct novel enzyme immunoassay (EIA) research and development projects for the detection of drugs of abuse urinalysis, oral fluid testing, and therapeutic drug management (TDM) testing to obtain FDA 510(k) clearance and CLIA categorizations
- Establish internal LZI Liquid Chromatography/Mass Spectrometry (LC/MS) process
- * Additional duties may be added as the need arises.

SPECIFIC DUTIES:

- Perform all Development Associate Level I, II, and III duties at a high level
- Perform studies for high priority collaboration projects to new analyzers
- Trouble-shoot all areas of assay development in collaboration with multidisciplinary departments (e.g. Technical Support, Quality Control, Production, Immunology, and Organic Chemistry) and conduct independent research studies to address company needs
- Research and justify assay specifications (such as target range, cross-reactivity profile, and toxicity) for novel TDM, Urinalysis, and Oral Fluid projects
- Research, design and develop studies that comply with FDA guidance and regulations, including creating specifications for novel TDM projects
- Establish internal LZI Liquid Chromatography/Mass Spectrometry (LC/MS) process and perform validations
- Train additional staff as needed on EIA Assay Development, LC/MS process, and other areas as necessary
- Generate independent research and relate results in conference presentations and collaborate with academic researchers in discussion of results
- Generate independent studies that enhance the growth of LZI's product portfolio
- * Additional duties may be added as the need arises

JOB DESCRIPTION

QUALIFICATION & EXPERIENCE REQUIREMENTS:

- Ph.D. in biology or chemistry related field or equivalent (4+ years of R&D laboratory experience)
- Knowledge and experience with immunoassay research is a plus
- Excellent interpersonal communication and organizational skills
- Excellent writing skills
- Proficient with Internet/e-mail, Microsoft Word, Excel, and PowerPoint programs are required
- Able to work in the cold room periodically, which is kept at 2 – 8°C (35.6 – 46.4°F)
 - * After hiring, required to provide a vaccination record and confirm current Hepatitis B status and COVID-19 vaccination status
