

LZI Norbuprenorphine Controls

IVD For In Vitro Diagnostic Use Only

Lin-Zhi International, Inc.

REF		Description	Quantity
0272		Norbuprenorphine 3 ng/mL Level 1 Control	1 x 5 mL
0274	or	Norbuprenorphine 7 ng/mL Level 1/2 Control	1 x 5 mL
0276		Norbuprenorphine 13 ng/mL Level 2 Control	1 x 5 mL

Intended Use

The Lin-Zhi International, Inc. (LZI) Norbuprenorphine Controls are for use as assayed quality control materials to monitor the precision of the LZI Norbuprenorphine Enzyme Immunoassay (Ref# 0270/0271) on a number of automated clinical chemistry analyzers.

Description of the Controls:

The LZI Norbuprenorphine Controls are human urine-based liquids, and ready to use. The constituent is a processed drug-free human urine matrix, containing buffers, stabilizers, and less than 0.1% of sodium azide. The controls are prepared by spiking known concentrations of Norbuprenorphine into the drug-free matrix.

*Actual concentrations of these calibrators are confirmed by GC/MS or LC/MS. Values are provided only as guidelines and laboratories should determine the ranges based on their own test system and tolerance (2).

Precautions and Warning

- The LZI Norbuprenorphine Controls are for in vitro diagnostic use only. Harmful if swallowed.
- The controls contain sodium azide, which may react with lead or copper plumbing to form potentially explosive metal azide. When disposing of such liquids always flush with a large volume of water to prevent azide build-up.
- The controls are prepared from non-sterile human urine. They are not tested by licensed reagents for the presence of antibodies to human immunodeficiency viruses, hepatitis antigens, and/or anti-hepatitis antibodies. They should be handled as potentially infectious. Always apply good laboratory practices to avoid any skin contact or ingestion.
- Do not use the controls beyond their expiration dates.

Preparation and Storage

The controls are provided ready-to-use. No reconstitution is required. Label the cap before removal to identify it with the original bottle. The controls should be stored refrigerated at 2-8°C when not in use.

Stability

When stored refrigerated at 2-8°C, the controls are stable either opened-recapped or unopened until the expiration date printed on the vial label. Store controls tightly capped when not in use. Control solution dispensed in the sample cups and left onboard the clinical analyzer should be discarded after use.

Procedure and Results

Both levels of controls (3 and 7 ng/mL for the 5 ng/mL cutoff and 7 and 13 ng/mL for the 10 ng/mL cutoff) should be run daily to ensure proper assay performance. Additionally, run the controls with each new calibration and after specific maintenance or troubleshooting procedures are performed. For interpretation of results, refer to the appropriate LZI Buprenorphine Enzyme Immunoassay (Ref # 0270/0271) package insert (3).

Limitations

The LZI Norbuprenorphine Controls are for use with the LZI Buprenorphine Enzyme Immunoassay (Ref# 0270/0271) to detect norbuprenorphine in human urine only. Quality control materials should be used in accordance with local, state, and/or federal regulations or accreditation requirements.

Symbols Used

	Authorized Representative		Date of Manufacture		Negative Control
	Biological Risks		Global Trade Item Number		Positive Control
	CE Mark		In Vitro Diagnostic medical device		Reference Number
	Consult Instructions for Use		Lot Number		Safety Data Sheet
	Contents		Manufacturer		Temperature Limits
	Country of Origin		Medical Prescription Only		Use-by Date
